Samuel Okafor

Analytics & BI Lead (fictional) · Code 9911 · fictional person for demos · no real PII

Summary

Leads a six-person analytics team. Spends his time on problem framing, metrics definition, stakeholder alignment and roadmap planning; still builds the occasional dashboard. Known for turning vague leadership questions into answerable ones.

Experience

Analytics & BI Lead — Analytics Branch (fictional), 2019–present

- Problem framing and metrics definition with division leadership; owns the analytics roadmap planning and risk register.
- Dashboard design standards and data storytelling coaching for the team; Power BI governance.
- Stakeholder alignment across planning, production and finance; responsible AI use policy for analyst use of approved AI tools.
- Mentoring and knowledge transfer program; qualification planning for new analysts.
- Systems thinking workshops on how planning data flows through the yard.

Senior Analyst — Production Control (fictional), 2014–2019

- Forecasting and statistical analysis of throughput; SQL and Power BI; no hands-on cloud or Kubernetes experience.
