Elena Vasquez

DevOps / Platform Engineer (fictional) · Code 1513.3 · fictional person for Synapse demos · no real PII

Summary

Platform engineer responsible for the branch's CI/CD, container platform and cloud observability. Security-minded: runs access reviews and owns the incident readiness runbooks.

Experience

DevOps Engineer — Digital Tools Branch (fictional), 2020–present

- Built CI/CD pipelines (GitHub Actions, Azure Pipelines) for 14 services; deployment automation with blue/green releases.
- Operated Kubernetes container platforms on AWS; infrastructure as code with Terraform and Bicep; cloud networking and identity & access (IAM, SSO) design.
- Cloud observability with Prometheus/Grafana and centralized logging; resilience & recovery drills twice a year.
- Security controls and vulnerability triage with the cyber team; quarterly access reviews; incident readiness runbooks and tabletop exercises.
- PowerShell automation for Windows build agents.

Systems Administrator — Network Operations (fictional), 2016–2020

- Windows/Linux administration, scripting, zero trust design pilot.

Skills

Kubernetes, Docker, Terraform, AWS, GitHub Actions, Azure Pipelines, PowerShell, Prometheus, Grafana, IAM, SSO, security controls, vulnerability triage, incident response

Certifications

- Certified Kubernetes Administrator (CKA), 2023
- CompTIA Security+ (renews 2026)
- AWS Certified Solutions Architect – Associate, 2022

Education

B.S. Information Technology, Harbor College (fictional), 2016
